

PRESS RELEASE

Würth Industrie Service at the Fastener Fair Global in Stuttgart: Fasteners by specialists

Bad Mergentheim/Main-Tauber-Kreis.

From 21st to 23rd March 2023, Würth Industrie Service will present its extensive product range, technical services and innovations along with the system solutions on efficient C-Parts management at booth 618 in hall 1 at the Fastener Fair Global 2023, Stuttgart.

Fastener Fair Global is an international platform for manufacturers, wholesalers, distributors and suppliers of fastener and fixing technology and is organised in Stuttgart once every two years. This trade fair covers all areas of fasteners and fixing elements, and offers important information about the latest developments in this industry as well as interesting insights into current trends.

Screws, nuts, washers - seemingly banal and yet extremely valuable: Even the lack of a single fastener can bring the production of a machine or an industrial plant to a standstill. As a holistic partner, Würth Industrie Service ensures that the C-Parts are always available to their customers exactly where and when they are needed: Fasteners. With certainty. At this year's Fastener Fair Global, the company will present a comprehensive overview of its specialised C-Parts spectrum with more than 1,400,000 items used for industrial production as well as for maintenance and servicing along with the innovative and fully automated system solutions. Interested visitors will get the opportunity to explore the application-specific parts from the W.TEC® product series along with the standard parts, norm parts, special and drawing parts as well as auxiliary and operating materials live at the event.

C-Parts innovations for the industry: W.TEC® product series

With the W.TEC® product series, Würth Industrie Service has reimagined fasteners in their different application scenarios. The goal is to offer innovative and unique products and technologies, which provide the most optimal solutions for the respective application scenario. Be it wedge lock systems, spring band clamps, protective caps, products for pressure vessel construction or screws for thermoplastics - every single industry requires products that are designed for very specific purposes. That is why special

competence teams are set up for customers for various industries. Equipped with such expertise, the company can offer advice on all aspects of the product range and specific applications, clarify detailed technical questions or collaborate on design ideas.

A perfect combination of technology and know-how

The focus is not only on the range of products and services of Würth as a reliable C-Parts partner for the industry, but also on the technical competence, the range of services offered by the test laboratory, which is accredited according to DIN EN ISO/IEC 17025 for over 50 standard-compliant procedures, and the application consultancy for fasteners and fastening elements. Additive manufacturing process plays an important role here. Compared to the classic manufacturing methods, this process makes way for completely new possibilities and helps in increasing flexibility, efficiency and speed. With additive manufacturing, industrial customers can not only reduce lead times, development cycles and total costs for complex components, but can also improve their performance, weight and functionality, while also being able to reinvent the geometries of developments and components. Equipped with their vast industry experience, the expertise in conventional and innovative manufacturing processes as well as comprehensive knowledge of the process landscape of the customers, the experts at Würth Industrie Service are able to select the right process and the best-customised solution. Visitors can get personalised advice on this at the booth.

A visit at the booth 618 of Würth Industrie Service in hall 1 at the Fastener Fair Global in Stuttgart is definitely worthwhile!

Brief profile of Würth Industrie Service GmbH & Co. KG

Within the Würth Group, Würth Industrie Service GmbH & Co. KG is responsible for supplying to the industrial sector. Since its foundation in the year 1999, the company is located at Industriepark, Würth in Bad Mergentheim, Germany with over 1,750 employees.

As a one-stop C-Parts provider, the company offers its customers a specialised product range with over 1,400,000 items: from screws and tools to connection and fastening technology, technical chemicals as well as occupational safety solutions. Aside from the extensive standard product range, the strength of the company lies in its customer-specific, logistical and dispositive supply and service concepts as well as special parts. Under the service brand "CPS® - C-Product Service", the company offers modular solutions customised as per the customer's requirements. These consumption-based and demand-based systems streamline the processes for purchase, logistics and quality assurance while enabling the procurement of small parts in a cost-optimised manner. Logistic and dispositive services such as shelving systems that use scanners or a just-in-time supply using Kanban bin systems play a significant role in increasing productivity.
